

1. Version number changes				
No.	Details	Subject source code	Line	No.
1	Change file header version number to 1.01.01. Change release date.	All files		
2	Change BOOT_MESSAGE version number to 1.01.01.	kernel/sysmain/src/sysmain.h	30	1

  

2. Measures for bugs				
No.	Details	Subject source code	Line	No.
1	<del>Memory leak may occur since the</del> The memory area allocated from the memory area under OS control is not released properly sometimes.	kernel/tkernel/src/memory.c	99	1
2	<del>Memory leak may occur since the</del> The memory block allocated from variable length memory pool is not released properly sometimes.	kernel/tkernel/src/mempool.c	103	1

  

3. Quality improvements				
No.	Details	Subject source code	Line	No.
1	Revise comments.	kernel/tkernel/src/memory.c	72	1

# 1 Although utkernel.source/ is included at the beginning of each directory name in an archive, this has been omitted because it is common to all files.

# 1

# 2

# 3

# 2 "Line" refers to the line number in micro T-Kernel Version 1.01.00.  
When a change covers multiple lines, only the first line number is indicated.  
When a change spreads across different lines, the field is left blank.

# 3 The column of "No." (on the extreme right) is left blank when the number of changes is too great.
